

OPPORTUNITY: Actuarial Graduate

LOCATION: Melbourne, Australia

LIFE AT DYNAMO

Dynamo Analytics is an actuarial consultancy and software provider, established in 2012, in London. We are now a team of more than 50 employees across the UK, France, South Africa, Norway and Australia.

There are two key components to the business; our consulting team advises our clients on actuarial, financial and statistical modelling, and our software team continues to develop our innovative enterprise modelling platform, Psicle. This allows us to provide our clients a unique and complementary offering of a software solution and actuarial advice, and our teams work closely together across geographies to deliver these.

Being a close-knit team allows everyone to have a truly meaningful role, with the opportunity to add real value to both our clients and our growing business. Our team tell us that our people, their talent, expertise, collaboration and the work itself, is what makes Dynamo a rewarding and enjoyable place to be.

THE OPPORTUNITY

We have an opportunity for a bright and talented graduate with an interest in the use of technology to improve actuarial practice.

Working primarily on the consulting side of Dynamo, you will join a close-knit and growing team, assessing and identifying clients' needs, and supporting clients with their actuarial requirements including reserving, pricing, capital modelling and reporting

You will support the team as we develop and present professional advice based on rigorous, data-driven analysis. In addition, you will contribute to developing the company's technology proposition.

All will be completed with the support of our team of experienced analysts together with mentorship from our senior consulting team who will guide you as you progress with your onwards career. As you work across a range of projects you can expect to develop the foundational knowledge gained in your studies through application, transitioning your knowledge into core applied competency and building expertise.

We are looking for a great team player and self-starter with the ability to think creatively. You will be supported by a local and international team, who are always willing to share their deep and varied expertise.

You can enjoy career growth opportunities that extend beyond borders, supporting delivery for our clients, becoming a key part of their unique and transformational journeys, and helping us to grow the business.

REQUIRED SKILLS, EXPERIENCE AND ATTRIBUTES:

- An actuarial, mathematical, engineering, statistical or similar degree with excellent grades.
- Intention to study towards Fellowship with the Actuaries Institute (or equivalent), for which you will be supported.
- The ability to learn quickly and to use your core skills and knowledge to solve problems outside of your experience.
- A strong appreciation for the role that technology can play in businesses, either through formal studies such as data analytics, or through hobbies such as coding.
- A strong self-starter and able to demonstrate curiosity and inquisitiveness in your work.
- Strong written and verbal communication skills, for interacting with clients and communicating the results of your analysis to more senior members in the team.
- Collaborative and an individual who care deeply about helping the team succeed and delivering a high-quality work product to the client.
- General insurance experience and/or working knowledge of SQL, R or SAS would be advantageous, but not essential.
- Full right to work and remain in Australia.

TEAM FIT

Our values are simple: Expertise, Entrepreneurialism, Selflessness, Heroism and “#ClientLove”. These basic attributes add up to create a driven, motivated and engaged team.

We don't have a typical 'Dynamite' type, and having an identikit team is not what we aspire to. However, there are a few things we do have in common.

- We value having deep expertise and broad knowledge of an area, and rely on our collective expertise to add value to our clients.
- #ClientLove instantly resonates with every one of us in the team, and we each strive to deliver the best possible experience for each client.
- We all want to be a part of something disruptive and new, and want to add our knowledge and skills to shape the way.
- Working with others is our preferred style of getting things done; we're a tightly knit team and help each other constantly, we recognise the uniqueness of all, which combined, together, is what enables exceptional delivery.
- We're self-starters through and through.
- #EmployeeLove, our people are deeply humble humans, that together achieve outstanding success.
- We value drive and tenacity, for the things our people are passionate about – we call this the Dynamo “Spark”.

HOW TO APPLY

If you feel that you could be a good fit for our team, please send your CV and a cover note to careers@dyna-mo.com.

Recruitment is a two-way process, so we'd love to know what you are looking for and why this could be the place for you.
